

Summer Associate

NEW YORK, NY; WASHINGTON, DC; SAN FRANCISCO, CA; HARTFORD, CT

Axinn is a top-tier boutique practicing in the areas of antitrust, IP litigation and high-stakes commercial litigation. Our specialized practice offers associates superior professional opportunities and competitive compensation. We seek to hire students, like you, with excellence in a range of areas that illustrate your desire and potential to be a great lawyer. Academic distinction, law journal participation, moot court experience, and/or prior work experience are just a few of the characteristics that can set an applicant apart.

Our Antitrust practice is one of the largest in the country and counsels leading companies in diverse industries such as technology, health care, sports, aerospace, fintech and many others. We represent clients across the spectrum of antitrust matters: mergers, civil and criminal investigations, and litigation. While many of our attorneys have an economics background, this is not required.

Axinn's IP practice offers skills and experience in numerous industries and technologies, including all areas of life sciences, chemicals, mechanical, electronics and software. A STEM background or degree is preferred, but not required.

Axinn's commercial litigation practice represents companies in a broad range of business disputes, including matters involving licensing, allegations of unfair trade practices and fraud. Our trial lawyers have varied academic backgrounds but share a drive to persuade judges and juries through their oral and written advocacy.

Our Summer Associate position is not open to candidates who will now, or in the future, require U.S. visa sponsorship from the Firm, such as H-1B, TN, or E-3 visas.
