Pan Lee has spent the past decade handling patent litigation matters for technology companies such as Google, Amazon, Sony, and Autodesk. Pan previously worked as an electrical engineer in the research and development arm of Lockheed Martin Space Systems, designing missile defense and satellite systems and researching high power GaN amplifiers, thermophotovoltaics, and nanoparticle applications.

He has managed cases in district court, investigations before the International Trade Commission, IPRs and PGRs before the Patent Trial and Appeals Board, and appeals in the Federal Circuit in various technology areas, including wireless communications, video streaming, semiconductor fabrication, mobile applications, and 3D rendering.

In addition to navigating litigation strategies, he counsels clients regarding design-around considerations, patent portfolio management, and coordination of parallel international litigations. Pan has a Master's degree in electrical engineering from Stanford University and was a judicial extern for the Honorable Lucy H. Koh.
